The One- day Open International Symposium on „Progressing towards Ubiquitous Cadastre” was a successful event. Apart from international delegates, more than 200 professionals attended from the host and the neighbouring countries as well.

#### **About the Questionnaire on Public and State Land Management (Elikkos Elia, Cyprus and Richard Grover, UK)**

In May 2009, the national delegate of Cyprus, Mr. Elikkos Elia offered to work out a questionnaire on public and state land/ property management to be circulated among the members of Commission 7.

The aim is to collect basic information on state and public land properties in different countries and compare best practices as a basis for improving state and public land/property management policies. Because of the hot topic, I welcomed the proposal and advised Mr. Elia to give a presentation during the 2009 Annual meeting in Kuala Lumpur, but he was not able to come. He contacted Richard

Grover UK delegate to Commission 7 who is an expert in the theme to revise the questionnaire and give a presentation during the Kuala Lumpur Annual meeting.

Richard gave a presentation about the topic and finalized the questionnaire, which will be circulated soon. I encourage delegates to complete and return it to Richard allowing Commission 7 to deal with this important topic in the future.
